

Samples for a complete canine respiratory diagnostic workup are included in the table below.

Link to KSVDL's Test and Fees Page: <https://vetview2.vet.k-state.edu/DLABPortal/catalogSearch.zul>

Test	Test Code	Sample
Aerobic Culture	BAC-0100	Swabs (Nasal or Pharyngeal) (5 gm) Tissue (Lung, Lymph node or Tonsil) Washes (Tracheal or BAL)
Canine Respiratory Full Panel PCR	MDL-3400	Swabs (Nasal or Pharyngeal) (5 gm) Tissue (Lung, Lymph node or Tonsil) Washes (Tracheal or BAL)

Swabs for these test offerings must be:

Plastic-shafted, synthetic (non-cotton) swabs submitted in LIQUID transport media or 0.25 ml of sterile saline in a sterile preservative-free tube.

Please contact your veterinary supply distributor for available swabs.

If testing using the table result in negative results, the practitioner may consider the tests below to help with a definitive diagnosis.

Test	Test Code	Sample
Mysterious canine respiratory disease	MDL-0202	Swabs (Nasal or Pharyngeal) (5 gm) Tissue (Lung, Lymph node or Tonsil) Washes (Tracheal or BAL)
SARS Covid-2 PCR	MDL-6500	Swabs (Nasal or Pharyngeal) (5 gm) Tissue (Lung, Lymph node or Tonsil) Washes (Tracheal or BAL)
Virus isolation and Identification	VVI-0135	Swabs (Nasal or Pharyngeal) (5 gm) Tissue (Lung, Lymph node or Tonsil) Washes (Tracheal or BAL)

Swabs for these test offerings must be:

Plastic-shafted, synthetic (non-cotton) swabs submitted in LIQUID transport media or 0.25 ml of sterile saline in a sterile preservative-free tube.
