

Our Team:

BARTON COUNTY WANTS TO TEACH YOU ABOUT RABIES PREVENTION!

What is RABIES?

with this in mind Rabies can also transfer to humans.

+ PREVENTION TIPS!

1. LEAVE WILD LIFE, WILD

You should always leave wild life alone and not tamper with these animals. They easily become frightened and are leading in rabies cases.

2. VACCINATE

Vaccinating your pets prevents Rabies and the spread of this tricky virus.

All vaccines are different so ask your vet for the best treatment and help our furry friends today.

Remember friends, stay alert. In the next section Camelia will show you what to look out for. If you think you have been exposed, have been bitten, or just want to stay safe, the rest of our crew has some tips for you.

Lucas:

3. ALWAYS REPORT

Report all animal bite, no matter if they are wild or domestic, to your health care provider so they can determine your level for risk.
