

PREVENT RABIES!

Protect your animals with a rabies vaccination!

BEFORE RABIES:

Perfectly healthy, normal, sweet cat.

Rabies is a deadly disease that kills around 59,000 people each year. There is NO known cure, so it is HIGHLY important to prevent your animal from being infected.

AFTER BEING INFECTED:

The same cat, after being bitten.

How To Prevent:

- ALWAYS vaccinate your pets with the rabies vaccination.
- Do not attempt to mess with wild animals or keep them as pets.
- Be wary of unknown or stray animals, it is best to leave them alone.
